J. M. LUPTON & SON, INC., Plant Breeders and Wholesale Seed Growers

Recent selections of the All American Committee of the American Seed Trade Association are the Lupton Perfected Detroit Beet, the Ohio Canner Beet, the Penn State Ball Head Cabbage. These are grown only by Lupton

EARLY WONDER OR DARK CROSBYS

We have a highly selected and inbred stock of this type which is much commended; the root is dark purplish red slightly wider than deep, but not flattened. Next to Flat Egyptian it is the earliest dark beet.

EXTRA EARLY FLAT EGYPTIAN

The earliest dark beet.

EARLY ECLIPSE

A very early bright red turnip-shaped beet with white zones and a large green top, especially fine for greens.

EDMOND'S BLOOD TURNIP

Not so good as Detroit.

CROSBY'S EGYPTIAN

Just as early as Early Wonder but a lighter colored strain, more prominent zones, it matures quickly, has a good bunching top, and attractive outside color. Our stock has proven very desirable in the South for early market shipments.

CRIMSON GLOBE

A large round quick-growing light zoned beet. Good foliage.

LONG SMOOTH BLOOD

Used largely in centers which have a considerable Jewish population. We grow only the type which grows mostly above the ground.

WINTER KEEPER OR LONG SEASON

A beet of fine quality for winter storage. Half long blood type, green top.

BEETS

LUPTON PERFECTED DETROIT

In awarding to this beet the First Award of Merit in 1933 the All America Selection Committee says:

"PERFECTED DETROIT BEET—Entered by J. M. Lupton & Son, Inc., Mattituck, N. Y., is first Award of Merit winner and judges consider it the finest strain of blood turnip beet yet created. It is an early, round, dark red root, with medium foliage, produced by inbreeding and reselection over a period of eight generations on the Lupton farms. It seems to have the color, shape, top and earliness desired in this type, consists of red with no browns nor purples, has no white rings and has a fine top for bunching."

We cannot add much to the statement of the committee except to state that we now have this beet in quantity at reasonable prices.

LUPTON PERFECTED DETROIT

OHIO CANNER

Bred by nine generations of intensive selection work by members of the staff of Ohio Agricultural Experiment Station. We co-operate with them in multiplication and reselection of planting stock and are the only producers of the variety from stock seeds bred at the station. This beet was bred at the request of canning companies to obtain a stock which would peel with less steam, hold in the field at canning size longer, and without becoming tough or stringy, more smooth and round facilitating peeling, sweeter taste, and above all, of a uniformly dark red color with no purple beets which can brown. We are assured by canners it produces the handsomest pack possible.

Having very small foliage it can be planted closely to produce the maximum number of small beets.

The same characteristics make it desirable for home gardens.

We now have this in quantity at low prices and can endorse it without qualification.

Insist on obtaining it under this seal only.

OHIO CANNER BEET

OHIO AGRICULTURAL EXPERIMENT STATION

The seed in this package was produced by the only grower who is supplied with stock seed of the OHIO CANNER BEET, bred by the Ohio Agricultural Experiment Station. We believe this package to contain Ohio Canner Beet from stock seed bred by The Station, and recommend seeds of this variety sold under this seal only.

Chief Dept. of Horticulture

BEETS FOR STOCK SEED SELECTION AT OUR LONG ISLAND FARMS

Every field that we plant whether in the East or West is planted with stock seeds from our Long Island farms. In this respect we have no competition

J. M. LUPTON & SON, INC., Plant Breeders and Wholesale Seed Growers

Our trials at Mattituck are worth seeing in early July and in October. We test many strains of many sorts. We are happy to show them to any one interested in plant breeding or in fine stocks

MANGEL

LONG RED

GOLDEN TANKARD

GIANT HALF SUGAR ROSE

SLUDSTRUP

The Sludstrup should be used more than it is. It is of better quality and higher sugar content than others and for dairy trade is much more valuable.

SWISS CHARD

LUCULLUS

Curled and yellowish light green leaf.

GREEN LYON

Dark green leaves with broad white midrib, the best strain for home or market garden.

Green Lyon

PURPLE TOP WHITE GLOBE

A few years ago we started intensive single plant selection work on our stock of this variety and by inbreeding have produced a strain which we think is not equalled in the trade. Of the several hundred acres which we grow of this variety every acre can trace its ancestry back to the same single plant, inbred on our Long Island farms.

EXTRA EARLY WHITE MILAN

PURPLE TOP MILAN

WHITE EGG

SNOWBALL

More round and uniform than White Egg.

Purple Top White Globe Turnip

TURNIPS

EARLY WHITE FLAT DUTCH

PURPLE TOP STRAP LEAF

GOLDEN BALL OR ORANGE JELLY

AMBER GLOBE

POMERANIAN WHITE GLOBE

PETROWSKI

PURPLE TOP ABERDEEN

COW HORN

SEVEN TOP

SOUTHERN PRIZE

Lupton Neckless Rutabaga

RUTA BAGA

LONG ISLAND PURPLE TOP

A round, neckless stock not too large and coarse, free from side root, bred specially for market garden trade.

LUPTON EARLY NECKLESS

The greatest improvement in Purple Top Yellow Rutabaga in a generation. A stock three weeks earlier, entirely neckless, free from sideroot, round and uniform; its bulbs are half grown before American Purple Top starts to bulb.

SWEET PERFECTION WHITE

MACOMBER

JAPANESE TURNIPS

EXTRA EARLY WHITE BALL

The earliest turnip we have ever seen. Of Japanese origin, its foliage is more like an English turnip. In our trial grounds, this turnip produced marketable bulbs four weeks from seed, and far ahead of any other variety.

EARLIEST FLAT JAPAN

The earliest White Flat Turnip known—earlier than White Milan or White Flat Dutch, foliage upright like Shogoin, rendering it less liable to injury from lice.

SHOGOIN

A special stock of the Japanese Foliage Turnip already so successful in the South. Roots large, round, white; leaves upright. Our stock carefully reselected and bred.

While we have same reputation as producers of specialties which are necessarily high priced, yet we grow many acres and are prepared to meet reasonable competition as to price

J. M. LUPTON & SON, INC., Plant Breeders and Wholesale Seed Growers

We do professional breeding and testing work at our Long Island plant in many different sorts of plants. If you have same work to be done we solicit your inquiries

CAULIFLOWER

We expect to announce shortly the first Snowball or Erfurt type Cauliflower in commercial quantities ever bred and acclimated to the Eastern United States.

Ten years of intensive work and considerable expense have been devoted to a single strain.

Recent trial ground tests conducted in different parts of the country convince us that we have produced a variety that will stand up and make a crop under our American conditions better than any other.

If you have a trade for a fine strain of Cauliflower we shall be glad to furnish samples.

KALE

BLUE SIBERIAN

A special market garden strain of exceptionally healthy color and bred on Long Island to withstand severe winter conditions

BLUE CURLED SCOTCH

A very dark colored dwarf compact strain densely curled

Our two Kales are outstanding in any market. We have never known them to fail us.

Blue Siberian Kale

MUSTARD

We grow fine strains of Mustard adapted to the Southern market garden trade.

GIANT SOUTHERN CURLED

FLORIDA BROADLEAF

CHINESE BROADLEAF

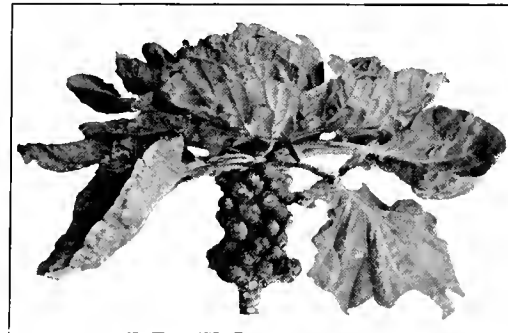

FORDHOOK FANCY

MUSTARD SPINACH

A Japanese plant of the mustard family which has become popular with gardeners for its extremely quick habit of growth, producing a marketable crop of excellent mild mustard greens in about four weeks from seed

BRUSSELS SPROUTS

Our Long Island strain of this is the only one which should be offered in the trade as it is the only acclimated variety. We are using the same stock used by the professional Long Island growers.

LONG ISLAND IMPROVED

SPINACH

We grow Spinach in the most desirable varieties both in the East and West. Our crops are available for earlier shipment than imported seed and we can deliver in time for the early fall sowing.

VIRGINIA BLIGHT RESISTANT

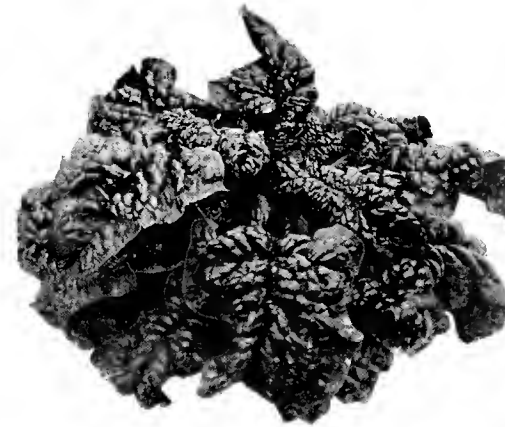

We have a special stock of this variety which while bred originally for the Norfolk fall sowing has been adopted much further north. Sown in the fall it holds green all winter without turning yellow.

RESELECTED BLOOMSDALE

A very fine strain of the great standard market Spinach.

LATE SEEDING BLOOMSDALE

The ideal Spinach for spring sowing. It will stand two weeks longer than others before bolting.

VIRGINIA BLIGHT RESISTANT SAVOY

The Only Genuine Strain of the PENN STATE BALLHEAD CABBAGE

PENN STATE BALLHEAD

THE PENNSYLVANIA STATE COLLEGE
Department of Horticulture

The seed in this package is produced by the only grower who is supplied with stock seed of the PENN STATE BALLHEAD cabbage grown by The Pennsylvania State College. In order to be sure of securing the true type of this variety, seed should be purchased only in sealed packages bearing this statement.

E. A. Meyer
Professor of Plant Breeding

Put up in your own packages, and sealed with the recommendation of the Pennsylvania State College, this item will satisfy the most exacting demand for a finely bred stock of Short Stem Ball Head.

The breeding work is to be maintained continuously by the College; therefore, no deterioration is to be expected in the future.

No extra charge is made for putting this seed in your packages on which our name does not appear.

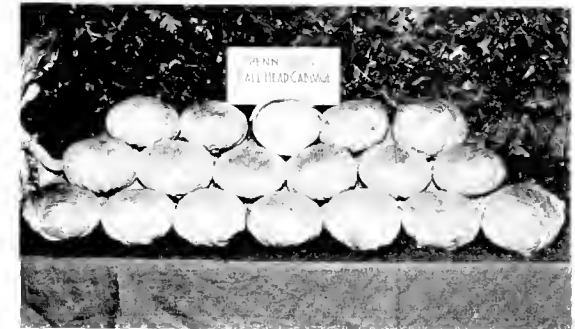

Exhibit at Penn State College

We solicit your wholesale business. It furnishes the volume necessary in order to justify our expenditure of time and money to produce better and better seeds for the seed trade

J. M. LUPTON & SON, INC., Plant Breeders and Wholesale Seed Growers

We believe that we are the most extensive breeders and growers of Cabbage Seed. We produce the stock seed of every variety and we test the quality of every lot of seed we grow

CABBAGE

EXTRA EARLY JERSEY WAKEFIELD

The small, compact, sharply pointed type.

EARLY JERSEY WAKEFIELD

About ten days later than Extra Early and considerably larger. The standard type.

CHARLESTON WAKEFIELD

The great Southern crop producer sold frequently as Long Island Wakefield.

EARLY WINNINGSTADT

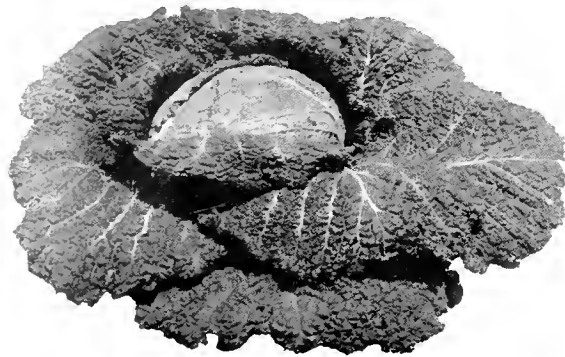

A sharp pointed head of good weight, not as early as the Wakefields.

LUPTON ROCK RED

Especially developed for the best market garden trade. Deep red, heavy yielding and vigorous. The most dependable red cabbage we know.

LUPTON FLAT SAVOY

The hardest headed, most densely curled strain we have seen. The photograph taken in our trials tells the story.

Lupton Flat Savoy

GOLDEN ACRE

We produce a very fine stock of this type of extra early market Cabbage. Not too small to be practicable, it is as early as Wakefield.

COPENHAGEN MARKET

A specially selected stock about ten days later than Golden Acre.

GLORY OF ENKHUIZEN

A round headed mid-season type used largely both for market and kraut.

ALL SEASONS

Frequently confused with Succession to which it is in no way related. An excellent main crop variety.

LARGE LATE DRUMHEAD

SUREHEAD—The original strain

LOUISVILLE DRUMHEAD

ALL HEAD EARLY

Originally selected on our Long Island farm and continuously bred from the same stock since that time. A rounded head, short and comparatively few leaves. Second early.

SUCCESSION

Similar to All Head Early, slightly more foliage and heads somewhat flatter.

EARLY SUMMER

A conspicuously light blue color, heads rounded.

STEIN'S FLAT DUTCH

Our introduction, has become extremely popular, displacing the later sorts to a large extent.

PREMIUM LATE FLAT DUTCH

HOLMES HOUSER

Used by growers in Pennsylvania and Ohio.

SHORT STEM DANISH BALL HEAD

We produce a fine strain of heavy producing Ball Head or Hollander especially for the storage and tonnage trade. This stock has no equal.

YELLOW'S RESISTANT CABBAGES

We have been giving special attention to Cabbages resistant to yellows with the idea of providing the trade with a reliable article at a reasonable price and lately have been doing our own breeding work on them near Racine, Wis. You can buy our strains with every assurance that they are right.

MARION MARKET

Resistant Copenhagen Market.

WISCONSIN ALL HEAD

A resistant form of All Head Early.

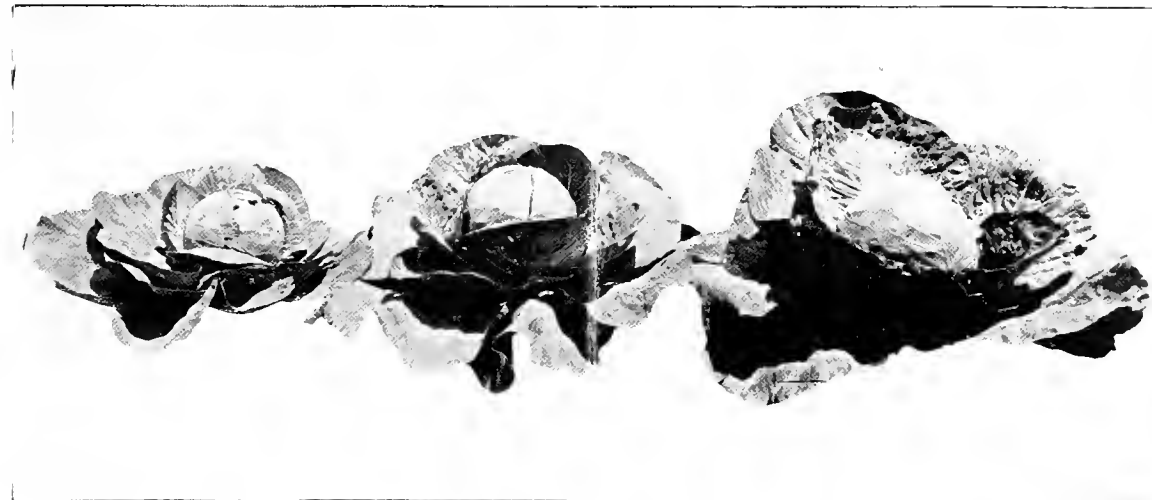

WISCONSIN BRUNSWICK

WISCONSIN ALL SEASONS

WISCONSIN HOLLANDER NO. 8

BUGNER

GLOBE—Resistant Glory of Enkhuizen

Golden Acre

Copenhagen Market

Glory of Enkhuizen

Danish Ball Head or Hollander

John M. Lupton succeeded to the business of Francis Brill in 1886. Brill was the first Long Island seed grower. The enduring reputation of Long Island seeds is due more to the men than to the place.
